Forecast for Tuesday 26 Apr 2022

Weather: Low cloud and some mist overnight, cloud becoming thick enough to produce a few snow flurries above 700m, likely to be drizzle below this height, mainly for the southern Cairngorms. By dawn it will be quite dull with a lot of cloud but this will slowly lift and thin with some bright spells by late morning. Some areas may see the cloud breaking quite nicely to give a bright or sunny day but cloud will be more persistent for other ranges which have more exposure to the northerly winds, for instance the Loch Muick summits and around Glenshee, summits will clear but cloud may not break very easily.

Chance of cloud-free hill tops above 800m: 40% improving to 85%, a lot of low cloud in the early morning will lift and thin during the day.

Low Cloud and visibility: At dawn cloud bases will be scattered or broken above 600m, perhaps more scattered at 700m further south and west of the area towards Loch Tay and Glen Lyon. Cloud will lift and clear with just patches of lower cloud around the Aberdeenshire hills above 700m in the afternoon.

Freezing Level*	900m	1000m	800m	800m	900m	900m	800m	600m	600m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View

Notice the lowering of freezing level allowing some light snowfall around munro summits and also the freezing of remaining snow pack on the higher munros like Lochnagar, leading to potentially icy conditions. A significant windchill will be experienced at height and it may be deceptively warm in the sunshine at lower levels.

Forecast for Wednesday 27 Apr 2022

Weather: A very cold start to the day but generally a very settled day with light winds. Bright or sunny spells are expected but it may be a cloudy start particularly around in the east.

Maximum wind: Mainly northerly 5-10 mph.

Chance of cloud-free hill tops above 800m: 60 rising to 90%, early low cloud is likely to lift and clear away.

Low Cloud and visibility: Scattered low cloud from 700m initially will lift and become patchy, perhaps just patches of cloud around 800m in the afternoon.

Temperature: **Glens:** Zero rising to Plus 10 Celsius.
At 800m: Minus 3 rising to Plus 4 Celsius.
Freezing level: 500m rising to 1100m later.
